Friday Family Update 6/5/2020

Dear Family & Friends -

We deeply respect and appreciate your trust and feel honored to be serving your loved one's needs.

We are happy to share that we continue to have no diagnosed COVID-19 cases among members and staff in our care community.

We are constantly reminding members and staff about the symptoms of COVID-19, and have asked them to let us know immediately if they feel ill. These symptoms include a fever or chills, cough, shortness of breath or difficulty breathing, among others. For a complete list of symptoms, please visit [CDC.gov/coronavirus](https://www.cdc.gov/coronavirus).

We continue to await specific guidance from the State in regards to how we can proceed with reopening our facility.

We will continue to update you on any changes in our operations our voice messaging service and email communication.

As always, if you have any questions or concerns, please feel free to contact me.

Thank you for your support as we continue to navigate through these times.

A handwritten signature in black ink, appearing to read "Megan M. Corcoran".
